Pre-Insulated Panels and Ducts

History

SAT was established 1981 as a humble trading company and has seen remarkable growth since over the years to become the SAT group of companies.

SAT has been identified as a reliable and well recognized group who specialize in HVAC, commercial kitchen air purification along with associated service spares, tools and equipment.

In industry; we have established manufacturing facilities producing; pre-insulated panels, conventional G.I. and flexible round ducts for air ducting systems. The factory is the only one of its kind in the region producing Phenolic and PIR pre-insulated panels.

SAT's successful history is based on integrity and client satisfaction whilst realizing our supplier's ambitions in the market we serve.

Mission

Professional sales approach.

Introduce quality and innovative products

Continuous business development

Provide services that exceed our customer's expectations

Vision

Maintain the highest professional standards

Ensure continuous customer satisfaction

Continued expansion into the global market

SAT GROUP of Companies

Sameer Abbas General Trading L.L.C

Sameer Abbas General trading L.L.C was established 1981. It is the showroom and trading outlet of The SAT Group. This company specialises in air-conditioning, refrigeration, air purification, water treatment and plumbing. Sameer Abbas General Trading L.L.C is one of the leading wholesale companies catering for the demands of local traders and projects in the Emirates and Export markets.

Sat Insulation Materials Industry L.L.C

Sat Insulation Materials Industry L.L.C. is factory unique in the region, the only factory that produces two types of continuous pre-insulated panels namely, Phenolic and PIR (Polyisocyanurate). The brand name of our pre-insulated panels is called SAT DUCT.

Thickness ranges 21 mm, 30 mm, 40 mm, 50 mm, up to 150 mm. Aluminum foil thickness varies according to the indoor or outdoor usage, 80, 200, 500 micron to suit the specification

Sat Ozone Air Conditioning Systems Supplies Manufacturing Co. L.L.C

It is one of the first factories in UAE producing all types of flexible circular ducting, matching world standard quality products, tested to ASTM standards. SATFLEX ducts are manufactured from the best quality tapes, fiberglass and stainless steel copper coated wire coated to prevent rusting corrosion.

Sat Gulf Electromechanical L.L.C

The company was formed in 2006 to provide Electro-mechanical contracting services and sub-contract work in the residential, commercial and industrial sectors. SAT GULF comprises of a team with vast experience in cost estimation studies, preparation of plans and specifications and project management. SAT GULF is licensed, in Dubai, UAE and has the essential ingredients to become one of the leading companies in this sector.

SATEL Decoration Sandwich Panels

Early in this millennium SAT established a factory to produce the most advanced and modern insulated sandwich panels for energy-efficient interior and exterior cladding of buildings and it can be used as: exterior cladding for prefabricated buildings; Interior decoration, wall-partitions and ceiling panels. SATEL panel has many benefits such as; beautiful designs and colors, excellent heat and sound insulation properties, so it is the best solution for rebuilding the interior and exterior cladding of buildings of all ages.

SATDUCT Panel

High quality Phenolic and PIR/PUR board manufactured to European standards from high tech production lines in our factory located in Jebel Ali, Dubai. These boards are used primarily for duct fabrication but have numerous other uses for applications requiring their insulation properties.

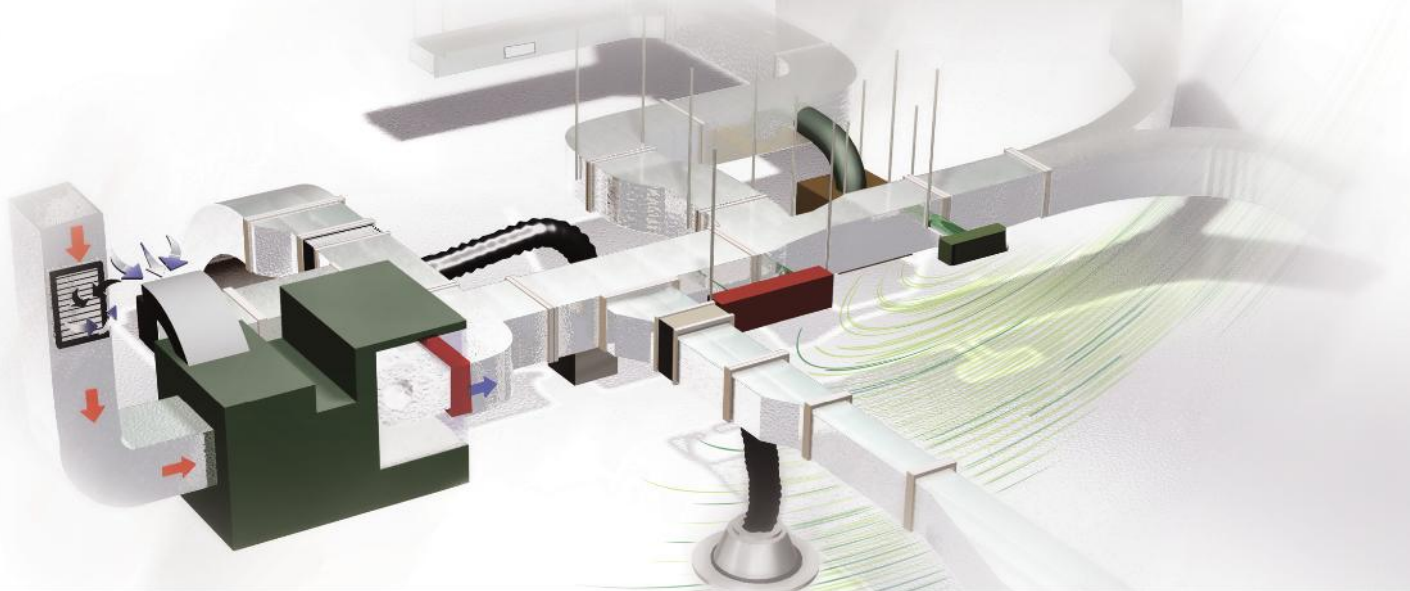

In th Middle East Phenolic board manufacturer is unique to SAT Insulation enabling us to offer this high quality fire resistant products at extremely competitive prices.

Phenolic

PIR

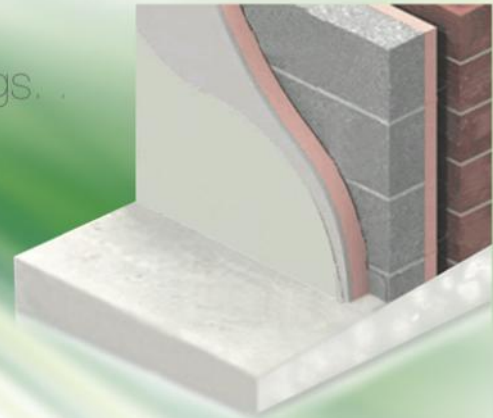

BUILDING INSULATION

Phenolic & PIR/PUR Insulation Board

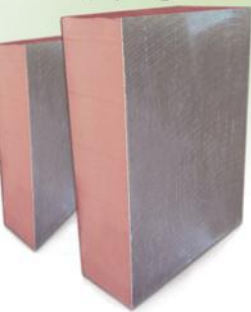

Complying with green building regulations.

Fire retardant for sustainable buildings.

Phenolic & PIR/PUR Insulation Block

Complying with green building regulations.

Fire retardant for sustainable buildings.

Phenolic Insulation Pipes

Complying with green building regulations.

PIR/PUR Insulation Pipes

Floral Foam

Keep your flowers fresh

satflex

Satflex duct systems are recognized in the industry as extremely reliable and durable. They match or exceed international standards and are tested to the ASTM standards. Satflex produce insulated and non-insulated flexible and semi-rigid circular ducts from 4 – 20 inch diameter. They are also available with aluminum metal inner and outer sleeves.

SATEL

Satel are an advanced designed Aluminum composite panel system. It is available in variety of designs to satisfy architects and designers. There are also preprinted galvanized roofing sheets available under the Satel brand. The composite panels are temperature and acoustically insulated for energy saving and comfort. Satel can be used for Tower, Villas and many other commercial buildings both inside and out.

TRION Air Purification Systems

Trion have been world leaders in commercial and industrial air filtration equipment since 1947. Specializing in Electrostatic Precipitation equipment (Ecology Units) Trion has the distinction of being the first company to be UL YYXS listed for kitchen exhaust treatment. The Trion T Series is a modular system designed for the harsh kitchen exhaust environment with an automatic wash option and can handle air volumes from 500 to 50,000 cfm. With more than 2,000 systems installed in the UAE alone Trion are the undoubted leaders in smoke and kitchen exhaust filtration.

AZCO

AZCO Industries specializes in the development and manufacture of Ozone Generators. AZCO ozone generators are suitable for numerous applications in the treatment of air by neutralizing obnoxious and odorous VOC's. These systems utilize the most natural, effective, economical, and environment friendly method of air purification. A good example of their use is in the elimination of cooking odours from commercial kitchen exhaust ducts.

A2Z OZONE INCORPORATED

A2Z Ozone brings the purifying benefits of nature's gift to you! A2Z is revolutionizing one of nature's most extraordinary marvels; Ozone. A2Z products, is designed as Multi Purpose Ozone Generator used for air, water and oil. A2Z products, efficient, reliable and heavy duty from household applications to light industrial and commercial applications.

VENTS was established in 90-s. and very quickly became a world leader in ventilation systems.

Today VENTS is a company located in a Europe with more then 2000 highly qualified specialists providing complete production process from conception to finished product.

Ventilation fans are available for most applications. Reliability, quality and competitive pricing add to its advantages.

Handheld Particle Counters ergonomically designed and lightweight, they are the newest, most advanced handheld particle counter on the market, featuring Mass Concentration Mode that approximates density in $\mu\text{g} / \text{m}^3$.

It displays both cumulative and differential particle count data as well as Temperature/Relative Humidity data on its easy to read 3.8" (9.65 cm) touch screen.

AC & REF INSTRUMENTATION

For over 25 years Mastercool has been supplying professional quality air conditioning service tools and equipment.

Mastercool introduces the most advanced and user friendly Digital Manifold on the market today.

Supco has been a manufacturer of precision electronic Test and Service Instruments and Refrigeration & Air Conditioning components since 1945. They are dedicated to producing high quality, innovative products at affordable prices to a wide range of customers. They have been able to accomplish an excellent growth record in all areas of business through continuous improvements in design, automation, customer service and quality.

Fieldpiece is the original creator of the modular Digital Multi Meter (MDM). Wide range of testing instruments designed particularly for the HVAC/R technicians.

COPPER TUBES

satube

High quality copper tubes & fittings made from 99.9% pure copper to the exacting standards laid down by the air conditioning & refrigeration industry for gasses & vacuum.

Standards: ASTM B 286 & EN 12735-1/2

tub-e[®]

The world's most versatile copper tubing

Tub-e is the name for copper tubing for all installation applications. Offering a wide product range from plain ACR and plumbing pre-insulated copper tubes and fittings tub-e is manufactured from 99,9 % pure copper that assure the highest possible quality.

Approvals: ASTM B,280
EN 12735 - 1

AC & REF ACCESSORIES

sat GROUP

Emerson Climate Technologies offers control solutions for residential, commercial, and industrial applications. Emerson's hardware and software control solutions are designed to improve system performance and save energy, while lowering downtime and maintenance costs.

- Compressor controls
- Cooling / Refrigeration Controls
- Hydronic Controls
- Mechanical controls

Johnson Controls is a global diversified technology and industrial leader serving customers in more than 150 countries. Our 168,000 employees create quality products, services and solutions to optimize energy and operational efficiencies of buildings; lead-acid automotive batteries and advanced batteries for hybrid and electric vehicles; and interior systems for automobiles.

Since 1981 Industrie technik have developed, produced, and distributed a wide range of instruments and regulators for controlling and measuring temperature, pressure, humidity, air quality, level and flow of fluids for the most diverse applications in building automation systems (BMS), for air-conditioning, ventilation, refrigeration systems and in air treatment units and fan-coil systems.

Satwell

Satwell Tapes

Satwell, Aluminum foil tape, PVC tapes and foam tapes, have been developed specially for HVAC with high quality, using acrylic adhesive, which adheres firmly and assures a powerful and long-lasting bond over a wide temperature range.

Satwell Thermostats

Top quality and specially made thermostats complying with high standard specifications.

Sat Duct Flexible Duct Connector

Sat Duct Connector's utilize a special double-lock technique to complement heating, cooling, ventilation and air conditioning systems. Sat Duct connectors are the perfect method to flexibly connect outdoor air handling units and ducts.

Satwell Vibration Absorber

Top quality vibration eliminator with UL mark. Connects to copper piping.

PLUMBING

Complete PPR and PEX plumbing systems.
Giacomini S.p.A. was founded in 1951 by Alberto Giacomini as a small workshop manufacturing brass taps. Since the beginning the philosophy of the company has been modernization and innovation. These ideals allowed Giacomini to expand into the main export markets and introduce itself as a leading European producer.

Vesbo is a leading manufacturer in thermoplastic piping industry.
Specializing in providing solutions to the in-house water transportation problems, specifically in plumbing, heating and sewage areas. VESBO PPR Pipes, PE-X pipes and fittings that are used for hot and cold water systems, are manufactured in accordance with DIN standards.

High quality engineered pressure reducing valves and other flow control valves for the plumbing applications.
